PROFILE

Certified full-stack web developer with over 15 years of experience in gastronomy and a strong customer service background. Transitioned smoothly into tech, contributing actively to the M3E DevOps team, specializing in frontend development and senior developer coordination. Skilled in creating dynamic features, maintaining GitHub repositories, and optimizing platform performance. Skilled in end-to-end website development with a focus on user interface design and efficient backend programming. Known for analytical thinking, attention to detail, and delivering high-quality solutions within challenging timeframes.

WORK EXPERIENCE

Front end developer

M3E GmbH   2023-2024

- Actively participated in the M3E DevOps team, collaborating closely with senior developers and teammates to foster teamwork and collaboration.
- Assumed a central role in the development of the M3E website, building components and dynamic features based on UX/UI design mockups.
- Utilized Tailwind CSS for styling and effectively employed the Vercel cloud platform with the Next.js framework.
- Responsible for the implementation of development projects using Typescript and Javascript, ensuring quality assurance and bug fixing for optimal functionality across different browsers and screen sizes.
- Managed multiple GitHub repositories efficiently, including collaboration with team members.
- Designed and implemented a one-pager for the M3E subsite with features like newsletters and whitelists using Mailchimp.
- Actively managed the migration of the Joomla CMS database to Sanity CMS as directed by the consultant team.
- Performed comprehensive testing procedures to ensure the quality and reliability of developments.
- Communicated closely with external service providers and participated in meetings to provide insightful concepts and solutions to the IT team.
